Thank you for your understanding

A-IT Contract Roles – 3 August 2026

Job Title: Operations Accounts Servicing Officer (Beginner) (Market Loans) (MAX 5397)

Work location: East

Duration: 12 months

Headcount: 1

Monthly Basic Salary: \$3200– \$4500

Job Description

Required Experience

- At least 3-5 years experience in marketing mass consumer products, preferably in loans products and services.

Job Purpose

- Build and develop relationships with business partners within the automotive industry by expanding distribution channels and ensuring auto loan applications processing turnaround time are met.
- Implement distinctive digital business solutions to grow customer base through networking and engagement.
- Support strategic business plans, including active sales pipeline to increase market share and presence as well as participate in product innovation.

Key Accountabilities

- Provide comprehensive account management services to automotive partners for auto loan financing solutions
- Work with business development directors to maintain and establish strong partners relationships and drive business to achieve profitable growth.
- Support and implementation of marketing plans and campaigns to acquire new customers and increase market share through various business acquisition channels.
- Keep abreast of industry changes and provide market intelligence to management and product teams for strategic planning.
- Taking ownership of assigned key accounts and complying with regulators and bank's policies.

A-IT Contract Roles – 3 August 2026

Job Duties & Responsibilities

- Assess, review and process auto loan applications of assigned key accounts to meet customer needs.
- Ensure that the loan processing turnaround time and operational efficiency are met.
- Timely processing of partners invoices in order for the loans to be disbursed seamlessly.
- Handholding of key accounts to provide best in class service to automotive partners and customers
- Contribute and participate in business strategies planning and marketing activities to grow business volume and market share.
- Work with business development directors in providing weekly and monthly market insights and intelligence on competitors and industry updates through business development reports.
- Work and communicate effectively with internal and external stakeholders
- Support the execution of marketing plans and strategies to drive market share and profitability of the business.

A-IT Contract Roles – 3 August 2026

Job Title: Compliance Officer (Beginner) (Trade Surveillance) (MAX 5398)

Work Location: Central

Contract Type: 6 months contract

Headcount: 1

Salary range: \$2800– \$4500

Job Description

- Perform trade surveillance monitoring for Global Financial Markets (GFM) using automated trade surveillance system and internal reports to identify potential market abuse or misconduct and ensure adherence to applicable regulatory and internal compliance requirements.
- Perform communications review for GFM by reviewing alerts in ECRUISE system, conduct voice monitoring, sampling review, reviewing of emails, tape recordings etc.
- Ensure timely and effective review of alerts generated by surveillance systems and internal reports.
- Undertake Control Room responsibilities, including maintaining and reviewing restricted and watch lists, managing wall-crossing and information barrier procedures, providing pre-trade and transactional guidance on conflicts and handling of MNPI, and escalating potential breaches in a timely manner.
- Review and manage surveillance exceptions and prepare reports to management.
- Investigate, document and close surveillance alerts thoroughly and within required timelines, ensuring that significant issues are fully investigated and promptly escalated (e.g. UAE/STR) where necessary.
- Ensure surveillance monitoring procedures and parameters are appropriately maintained and updated to reflect changes in business activities and market conditions.
- Liaise and work closely with Middle Office Technology team and external vendors to enhance existing processes and develop new or automated systems and monitoring tools.
- Participate in system and process implementation activities, including user acceptance testing (UAT) and business integration.
- Design, build and deploy agentic AI tools (e.g., workflow assistants, alert triage and investigation copilots) to drive operational efficiency, streamline end-to-end surveillance and control room processes and enhance controls governance.

A-IT Contract Roles – 3 August 2026

Job Title: Compliance Officer (intermediate) (MAX 5399)

Work Location: Central

Contract Type: 6 months

Headcount: 1

Salary range: \$4000 - \$6500

Job Description

Group Legal, Compliance & Secretariat ensures that the bank's interests are protected by zealously guarding and enhancing its reputation and capital. We also work to maintain a good standing with all our regulators, customers, and business partners. Because we believe that at the heart of business banking is to uphold the values of trust and integrity for all our stakeholders.

Job Responsibilities:

- Investigate and assess alerts/escalations for potential money mule and money laundering risk in the Bank
- Ensure efficient identification money mules and monitoring of suspicious activities and transactions, and timely escalation to respective parties where appropriate
- Preparing, reviewing, and/or filing Suspicious Transaction Reports (STRs) and ensure timely reporting of suspicious transactions to the authorities
- Assist with money laundering related queries or escalation received from business units, compliance units and/or other relevant stakeholders
- Liaise with other compliance units and businesses regarding surveillance issues
- Participate and assist in transaction surveillance projects
- Undertake other ad-hoc duties as and when required, e.g., provide statistics and ensure accuracy of data, extract of documents for audit review
- Maintain a current understanding of scams and money laundering issues, including policies, procedures, regulations, industry best practices, criminal typologies and developing trends
- Support Team Leaders/Managers to ensure success and positive outcomes for the team, including (but not limited to) meeting of Team KPI/targets; and providing guidance/mentorship to team members

A-IT Contract Roles – 3 August 2026

Job Title: Business Analyst (Beginner) (MAX 5402)

Work Location: East

Contract Type: 12 months

Headcount: 1

Salary range: \$3200 - \$5000

Job Description

Responsibilities:

1. Corporate Actions Domain & BAU Support

- Act as the subject-matter expert for Corporate Actions applications within the assigned business vertical, maintaining detailed knowledge of system architecture, interfacing systems, data flows, and data content.
- Support user communities on daily BAU activities by responding to business queries and providing guidance on optimal system usage.
- Ensure Corporate Action events are processed accurately and within agreed timelines, in compliance with market requirements and internal standards.

2. Client Servicing & Controls

- Ensure timely and accurate client notifications for voluntary Corporate Action events (e.g. rights issues, dividend options, warrant expiry, redemptions).
- Ensure correct capture and execution of client instructions and safeguard client entitlements throughout the event lifecycle.
- Handle client and stakeholder enquiries professionally and promptly, maintaining a consistently high standard of service quality.

3. Testing & Delivery Governance

- Define and recommend appropriate testing strategies, sign-off criteria, and obtain stakeholder concurrence.
- Lead and manage User Acceptance Testing (UAT), including planning, timelines, batch runs and re-runs, and consolidation of testing outcomes.
- Ensure test issues and defects are tracked, resolved, and validated prior to deployment.

4. Documentation & Governance

- Prepare and maintain high-quality documentation on data flows, solution design, business logic, and testing approach, in accordance with predefined templates and governance standards.
- Ensure strong controls, auditability, and knowledge continuity are embedded into delivered solutions.

A-IT Contract Roles – 3 August 2026

Requirements

- Strong domain experience in Corporate Actions processing, covering mandatory and voluntary events.
- Hands-on experience in system testing (SIT/UAT/regression) within a banking or financial services environment.
- Good understanding of end-to-end processing, system integrations, and data flows.
- Proven ability to work closely with Technology teams, project stakeholders, and operations users.
- Strong documentation, analytical, and stakeholder management skills.
- Demonstrates a risk-aware mindset with focus on quality, controls, and client outcomes.

A-IT Contract Roles – 3 August 2026

Job Title: Risk & Control Analyst (Beginner) – Market Risk Monitoring & Reporting (MAX 5403)

Work Location: Central

Contract Type: 19 weeks

Headcount: 1

Monthly salary: \$3200 – \$4500

Job Description:

Requirements:

Role Overview

The Market Risk Controller Contractor will support the Bank's Market & Liquidity Risk (MLR) team in the day-to-day monitoring and control of market risks. The role offers exposure to market risk management processes, risk systems, data analysis, and regulatory-driven projects.

Education:

- Bachelors' Degree
- At least 10

Key Responsibilities

- Assist the team in carrying out **daily market risk monitoring and control activities**, including reviewing risk reports and supporting risk governance processes.
- **Support User Acceptance Testing (UAT) for market risk-related projects**, system enhancements, and regulatory initiatives.
- **Conduct market risk data analysis and research** to support risk assessments, reporting, and management decision-making.
- Assist in investigating data quality issues and collaborating with stakeholders to resolve discrepancies.
- Prepare ad hoc analyses, reports, and presentation materials as required.
- Support process improvement initiatives relating to **market risk monitoring and reporting**.

Requirements

- Degree or diploma in Finance, Economics, Mathematics, Statistics, Engineering, Computer Science, or a related discipline.
- Strong analytical and problem-solving skills.
- **Proficiency in Microsoft Excel; knowledge of SQL, Python, or data analytics tools is an advantage.**

A-IT Contract Roles – 3 August 2026

- Good attention to detail and ability to work with large datasets.
- Strong communication and interpersonal skills.
- Prior exposure to financial markets or risk management would be beneficial but is not mandatory.

What You Will Gain

- **Hands-on experience in market risk management within a leading regional bank.**
- **Exposure to risk systems, regulatory projects, and financial markets.**
- **Opportunity to work closely with experienced risk professionals across Treasury & Markets and Risk Management functions.**

A-IT Contract Roles – 3 August 2026

Job Title: PMO Business Management Support (Advanced) (MAX 5404)

Work Location: East

Contract Type: 30 weeks

Headcount: 1

Salary range: \$6000 - \$8000

Job Description

Key Responsibilities:

Strategic Sourcing & Procurement

- Manage the end-to-end procurement lifecycle from business requirement gathering through sourcing, contract execution, supplier onboarding, and post-award support.
- Lead sourcing projects for non-technology categories including:
 - Sales & Marketing services
 - Event management and production services
 - Creative and advertising agencies
 - Corporate services
 - Selected Facilities Management services
- Develop sourcing strategies that balance cost, quality, service, and risk.
- Conduct market analysis and supplier benchmarking to identify competitive sourcing opportunities.

RFQ/RFP Management

- Prepare, issue, and manage Request for Quotation (RFQ), Request for Proposal (RFP), and Request for Information (RFI) exercises.
- Coordinate supplier evaluations using predefined commercial and technical criteria.
- Facilitate cross-functional evaluation committees and provide sourcing recommendations supported by data and commercial analysis.
- Ensure sourcing processes are fair, transparent, and compliant with internal governance policies.

Supplier Negotiation & Contract Management

- Lead commercial negotiations covering:
 - Pricing
 - Service levels
 - Contractual terms and conditions
 - Performance metrics
 - Renewal and exit clauses

A-IT Contract Roles – 3 August 2026

- Partner with Legal and business stakeholders to review, negotiate, and finalise supplier contracts.
- Support contract execution and ensure all contractual documentation is complete and properly governed.
- Manage contract renewals and supplier performance reviews where applicable.

Stakeholder Management

- Serve as a trusted procurement business partner to internal stakeholders.
- Understand business requirements and provide sourcing advice that aligns with organisational objectives.
- Influence stakeholders on procurement best practices and policy compliance.
- Collaborate with Finance, Legal, Risk, Compliance, and business teams throughout the sourcing lifecycle.

Risk Management & Governance

- Identify procurement, commercial, operational, legal, and supplier risks throughout the sourcing process.
- Recommend appropriate mitigation strategies to minimise procurement risks.
- Ensure adherence to procurement governance, delegated authority limits, and organisational policies.
- Maintain complete sourcing documentation and audit trails for compliance purposes.

Supplier Relationship Management

- Develop and maintain effective relationships with key suppliers.
- Monitor supplier performance against agreed KPIs and contractual obligations.
- Drive continuous improvement and value creation through supplier engagement.

Requirements

Education

- Bachelor's Degree in Business, Supply Chain Management, Procurement, Finance, or a related discipline.
- Professional procurement certifications (e.g., CIPS, CPSM, ISM, or equivalent) are advantageous.

Experience

- 5–10 years of procurement, sourcing, or category management experience.
- Strong experience managing end-to-end procurement activities.
- Demonstrated experience conducting RFQ, RFP, and RFI exercises.
- Proven experience negotiating commercial terms, pricing, and supplier contracts.

A-IT Contract Roles – 3 August 2026

- Experience supporting non-technology procurement categories, particularly:
 - Sales & Marketing
 - Events and marketing services
 - Corporate services
 - Facilities Management
- Experience working within a structured procurement governance framework.

Technical & Functional Skills

- Strong understanding of the procurement lifecycle.
- Knowledge of sourcing methodologies and supplier evaluation techniques.
- Good understanding of contract structures and commercial terms.
- Ability to analyse spend, pricing models, and supplier proposals.
- Knowledge of procurement risk management and governance practices.
- Experience using procurement systems (e.g., SAP Ariba, Coupa, Oracle Procurement Cloud, Jaggaer, or equivalent) is an advantage.
- Strong proficiency in Microsoft Excel and PowerPoint.

Soft Skills

- Strong negotiation and influencing skills.
- Excellent communication and stakeholder management abilities.
- Commercially minded with strong analytical thinking.
- Able to work independently while managing multiple sourcing projects.
- High attention to detail with strong organisational skills.
- Collaborative, proactive, and solution-oriented.
- Demonstrates integrity, professionalism, and sound judgment.

Success Measures

The successful candidate will be able to:

- Deliver sourcing projects on time while meeting business objectives.
- Achieve measurable cost savings and commercial value.
- Successfully negotiate favourable commercial and contractual outcomes.
- Ensure procurement activities comply with governance, risk, and audit requirements.
- Build strong partnerships with stakeholders and suppliers.
- Identify and mitigate procurement risks before contract execution.
- Continuously improve procurement processes and sourcing outcomes.
